Additional Information

IMPORTANT NOTICE

If you are taking Vicodin, Lorcet or another medication containing hydrocodone

Overuse and abuse of hydrocodone is a public safety issue in the United States. To help cut down on the misuse of this drug, all medications containing hydrocodone have been reclassified by the U.S. Drug Enforcement Agency as a Schedule II narcotic effective Oct. 6, 2014.

This change means:

- Patients must take paper prescriptions to their pharmacy
- Prescriptions may not be written for more than a 30-day supply
- Refills are not allowed

This change is part of a national effort to prevent abuse of prescription pain medicine.

If you have been taking one of these medications for more than 1 month, please contact the prescribing physician's office for an appointment as soon as possible.

Additional Information

If you feel you or a family member/friend is at risk of suicide please call the National Suicide Prevention Lifeline at 1-800-273-8255.

Your health is important to us. We hope you are pleased with the care you have received. Soon you may receive a survey with important questions about your care. Please complete the survey and return it to us. Your thoughts about your care are important and will help us better serve you and other patients and families.

Thank you for choosing UAMS Medical Center.
